

- MUNICIPALITY CYBERSECURITY CASE STUDY -

THE CLIENT

INDUSTRY: City Government
TEAM SIZE: 150 (over 200 devices)
LOCATION: Bella Vista, AR (multiple offices)

THE SITUATION

- Backup strategy for on premise servers were outdated and lacked fast recovery
- Hardware and Software Asset Management, Patch Management and Remote Monitoring were lackluster and performed with outdated tools
- Remote users were lacking proper security
- New compliance standards necessitated a change in remote work and security practices

THE CLIENTS WORDS

“

The City of Bella Vista used American Rescue Plan funds to modernize cyber-security efforts. We evaluated multiple leading vendors and found that the solutions offered by Blue Guys IT were comprehensive and affordable. We have added many lacking features, including immutable backups both on-premise and in the cloud. We now have innovative remote control tools and modern ways to manage our infrastructure. Also, we have a comprehensive security package, including 24/7 monitoring of our network.

John Moeckel, CNIP
information technology
director

HOW DID WE HELP?

Over a 6 month period, we helped them transition to a secure, reliable and FAST I.T. system and helped them rebuild their faith in using Technology.

- We helped implement a new Remote Management and Monitor tool to manage all of their devices and maintain patch management
- We set their team up to be able to work securely from anywhere in the world, freeing them up from having to work only in their office
- We helped them sleep better at night by implementing an Enterprise Data Backup Solution and a Regular Testing Process
- We implemented our bespoke suite of Cybersecurity tools to help them avoid any future Ransomware or Cybersecurity incidents

Call us at 877-249-2583 to find out how we can help you!
