

Dear Healthcare Provider,

I would like to introduce myself and Blue Guys IT. We are a Managed IT Service Provider based in Mountain Home, AR. We contract with your practice to provide the support of an entire IT team for only a fraction of the cost to employ such a team. No more worrying about installing the latest patches and updates or whether your information is protected. We take care of it all!

We provide proactive management of computer systems through 24/7/365 monitoring, rapid response to and resolution of issues as soon as they are detected, managed anti-virus and cloud backup as well as regular, scheduled maintenance to reduce or eliminate ongoing problems.

We are an accredited provider with Microsoft to provide an A-Z **HIPAA** compliant solution. We deploy the most cutting edge technologies to keep your data safe, including Todyl – an always on virtual private network (VPN) that scans your data with over 30 Anti-Virus Applications.

Within this packet you will find additional information regarding who we are, Todyl and what additional methods we utilize to protect your data.

We would love the opportunity to sit down and explain in more detail how we can give you the peace of mind knowing your digital information is protected against cybersecurity threats such as viruses and malicious software.

Respectfully,

Jason Chamberlin
